PROFESSIONAL SUMMARY

React Native and Full Stack Developer with hands-on experience building scalable mobile and web applications using React Native, Flutter, Node.js, MongoDB, REST APIs, and TypeScript. Skilled in authentication systems, API integration, responsive UI development, and backend architecture. Hackathon winner with experience delivering production-ready client projects and serverless applications.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, GO, JavaScript, TypeScript, HTML5, CSS3

Frameworks: React Native, Next.js, Flutter, React.js, Node.js, Express, Tailwind CSS

Backend & APIs: REST APIs, Redis, JWT Authentication, OAuth, Rate Limiting, Google Sheets API, API Integration

Databases: MongoDB, MySQL

Tools & Technologies: Git, Docker (Basics), Linux, DBeaver, Postman/Requestly, REST Clients, Payment Gateway Integration, Mobile Applications, Figma

Concepts: RESTful APIs, Client-Server Architecture, Authentication & Authorization, Asynchronous Programming, State Management, Props vs State, Component-Based Architecture, CI/CD Basic

EXPERIENCE

Freelance Full-Stack Developer – Anvera Esport

Remote

- Developed a scalable esports tournament platform using Next.js, Node.js, MongoDB, and REST APIs supporting real-time tournament workflows and player management.
- Implemented real-time tournament tracking, player registration, and leaderboard systems, improving match management efficiency for competitive gaming events.
- Optimized server-side rendering and responsive UI components, improving application performance and user experience across devices.

Freelance Backend Developer – TktHive

Remote

- Developed scalable backend architecture using Node.js, MongoDB, and Redis with OTP authentication, password-based login, session handling, and role-based access control.
- Reduced API response latency by 40% using Redis caching, asynchronous processing, and modular RESTful architecture for high-concurrency backend workflows.
- Implemented push notification systems, JWT authentication, rate limiting, input validation, and secure API workflows to improve backend reliability and security.

PROJECTS

Form2Mail | *EJS, Node.js, REST APIs, Email Automation, Google Sheets API & Serverless* | Beta Version

- Built a serverless form-handling platform enabling static websites to process submissions with automated email workflows and Google Sheets integration.
- Automated storage and processing of 100+ form submissions using Google Sheets API integration and serverless workflows.
- Implemented validation, sanitization, and rate-limiting mechanisms to improve security and prevent malformed input processing.

Music App Auxify | *React Native, Node.js MongoDB, APIs, Spotify APIs, OAuth & Streaming* | GitHub

- Developed a React Native music streaming application integrated with Spotify APIs and OAuth authentication for personalized playlist management.
- Improved mobile content loading performance by 30% through lazy loading and API response caching techniques.
- Designed scalable RESTful backend architecture supporting concurrent users and modular service integration.

NexGEN IRCTC | *Flutter, Node.js MongoDB, RapidAPI, UI/UX & Accessibility* | GitHub

- Redesigned a railway booking application using Flutter and Node.js with RapidAPI integration for real-time train data retrieval.
- Designed responsive Flutter interfaces with reusable components, reducing UI development redundancy and improving maintainability.
- Implemented accessibility-focused UI/UX improvements and scalable frontend architecture for better mobile usability.

urlShortner | *PHP, HTML, MySQL* | GitHub

- Developed a URL shortening platform using PHP and MySQL with collision-resistant key generation and optimized redirect handling.
- Improved redirect query performance using indexed database optimization techniques for high-frequency URL access.
- Implemented secure input validation and sanitization to prevent malformed URL submissions and injection attacks.

EDUCATION

Master of Computer Applications (MCA)

Manipal University Jaipur

CGPA: 8.26

2025 – 2027

Bachelor of Computer Applications (BCA)

Lovely Professional University

CGPA: 7.17

2022 – 2025

Intermediate

Dhwarka High School

Percentage: 72%

2020 – 2022

ACHIEVEMENTS & LEADERSHIP

Award College Youth Ideathon (CYI) · SBI Foundation · IIT Delhi : Received national recognition at the College Youth Ideathon (CYI).

Winner - Web-E-Stan 4.0 Hackathon, School of Computer Science & Engineering, LPU: for building a farmer-to-consumer marketplace solution.

Winner - Inter-college Hackathon, PCTE Groups of Institute: for innovative full-stack application development.

Student Organization Head – InnovXus: Led the university coding club for 2+ years, organizing hackathons, coding workshops, and competitive programming events while mentoring a community of 1,500+ students across multiple disciplines.
